

BARRIER TAPES

Reliably enclose, warn, secure and mark

KELMAPLAST BARRIER TAPES: In every respect, state of the art

Das Original!

Enclosing, warning, securing, marking – all clear cases for **KELMAPLAST** barrier tapes, in successful use now for nearly five decades.

Whether for building sites, hazardous areas, sports events, festivals, or for other applications, the tear-resistant barrier tapes from **KELMAPLAST** are in every respect state of the art and, with their lightfast signal colours and permanently legible print, guarantee the powerful warning effect required.

All available versions come in high-quality, sustainably ecofriendly special polyethylene and resistant to numerous influences, including UV rays, heat, cold and humidity.

The standard range consists of four different tear-resistant types to meet our customers' varying requirements. The standard versions come in red/white blocks or diagonal stripes, but the products can also be supplied in any colour the customer wishes and also printed with a customised text. The standard print colour is black.

Lasting quality of the very highest standard as well as extremely simple and economical handling are the outstanding features of all our products. The barrier tape we call "No 11" today is regarded as **THE ORIGINAL** in the world of barrier tapes and has proved itself millions of times over in all manner of applications.

KELMAPLAST Barrier Tape No 11 – 35 µm

Special polyethylene, red/white blocks or diagonal stripes on both sides.

Technical features

Thickness: 35 µm ± 5 µm
Elongation: up to 100%
Light resistance: 5-6

WIDTH

80 mm ± 2 mm

LENGTH

500 m ± 0,5 m

PACKAGING

Dispenser box
