

## Declaration of conformity according to REACH regulation

Status: 11/24 => SVHC list with 242 substances

Regulation (EC) No. 1907/2006 (REACH Regulation) is the EU regulation on the registration, evaluation and authorization of chemicals. It regulates the handling of chemical substances in preparations and products. Through REACH, the use of chemical substances should be completely traceable from production to end use. After all substances have already been pre-registered by the manufacturer or importer, the individual chemical substances will be registered by 2018.

### Registration of chemical substances

Kelmaplast G. Kellermann GmbH is a “downstream user” within the meaning of REACH. Our products are considered “products” and not “substances” and as such are not subject to registration.

The raw materials used are either not subject to registration requirements (polymers) or are registered by our suppliers (auxiliary materials, adhesives).

No chemical substances are released from our products under normal conditions of use (see article 7 paragraph 1 of the REACH Regulation).

### Substances of very high concern (SVHC) according to Article 33 of the REACH Regulation

According to current knowledge, our products do not contain any of the “substances of very high concern” listed on the candidate list of the European Chemicals Agency ECHA.

ECHA candidate list: <http://echa.europa.eu/de/candidate-list-table>

We comply with the obligation under Article 33 of the REACH Regulation and inform our customers immediately if, according to new knowledge, our products contain “substances of very high concern” above the limit of 0.1%.

**We hereby confirm that all Kelmaplast products comply with the REACH regulation.**
